

# UNILEVER UK PENSION FUND

## DEFINED CONTRIBUTION ANNUAL STATEMENT

### Introduction

The Unilever UK Pension Fund (the 'Fund') is a "hybrid" scheme as it provides both Defined Benefit (DB) and Defined Contribution (DC) benefits. The Final salary plan and Career average plan are Defined Benefits. The Fund's Investing plan and its "legacy" Additional Voluntary Contribution (AVC) arrangements are DC arrangements. When we refer to 'legacy' AVCs throughout this statement, we mean those AVC arrangements that were in place before the Investing plan and those DC arrangements that came into the Fund following Unilever's acquisition of another company which are not invested in the range of funds which are used for the Investing plan.

This statement, which covers the period from 1 April 2020 to 31 March 2021, is only about the Fund's DC arrangements – it covers the Fund's Investing plan set up in 2008 which is administered by Fidelity Investments Life Insurance Limited ('Fidelity') and the Fund's various legacy AVC arrangements which are held with external providers. It is a legal requirement for trustees to include an annual statement regarding governance of their DC arrangements in the report and accounts. This statement details how the Fund Trustees:

- have designed a default investment strategy that is in the members' interests and keep it under regular review;
- ensure that core financial transactions are processed promptly and accurately;
- have assessed the value of costs and charges borne by scheme members; and
- ensure Trustee Knowledge and Understanding requirements are met.

### The default investment strategy

The Fund is used as a 'qualifying scheme' for auto-enrolment. The Investing plan has a range of funds in which members can choose to invest, including a default investment strategy. Members who do not actively choose which funds to invest in are placed in the default investment strategy which is a lifestyle arrangement with three funds: the Moderate Growth Fund, the Cautious Growth Fund and the Cash Fund. The Statement of Investment Principles for the default strategy ('Default SIP'), in the appendix to this statement, gives more information about the default strategy. There is no default strategy associated with the legacy AVC arrangements.

### Investing plan review (including the review of the default arrangement and its performance)

The Trustees review their aims, objectives and policies in relation to the Investing plan funds, including the default investment strategy, and the performance of the default investment strategy, at least every three years.

The most recent full review of the default strategy and the performance of the default arrangement took place in the second half of 2020 and was completed on 14 October 2020. The review was prompted by Unilever proposing a number of changes to the benefits provided through the Fund and in response to these proposals the Trustees carried out a review to ensure that the Investing plan would remain suitable if the proposals went ahead. One of the main proposals was to close the current DB section of the Fund to new entrants and to offer new members of the Fund DC only benefits through the Investing plan.

As part of the review the Trustees considered, among other things, the interests of members, the risk and return profile, fees and the performance of the default arrangement against its aims and objectives. As a result of the review, after considering the advice from a professional investment consultant, the Trustees reached the following conclusions, which included the decision to set up a separate default arrangement for the new DC only member section, expected to take effect from 1 October 2021:

- the current fund choices and their objectives remain appropriate for both the current Investing plan members and any future members who would build up DC benefits only
- the current automatic switching facilities remain appropriate for the current Investing plan members
- the same automatic switching facilities will be offered to the new DC only members with the exception that the automatic switching facility that targeted annuity purchase would target a final allocation of 25% cash and 75% bonds
- the default arrangement in place remains appropriate for the current Investing plan members
- the default arrangement for the new DC only members will be the automatic switching facility which starts in the Moderate Growth Fund and targets a final investment allocation of 25% cash and 75% Cautious Growth Fund

These decisions were subject to Unilever's proposed benefit changes going ahead in a manner consistent with Unilever's proposal with effect from 1 October 2021. No changes were made to the existing default arrangement which applies for the current Investing plan members as a result of the review.

## UNILEVER UK PENSION FUND DEFINED CONTRIBUTION ANNUAL STATEMENT (continued)

The Trustees are exploring with the Company potential retirement solutions options for members once the above benefit changes have been implemented. The implementation of the proposed benefit changes is expected to take place on 1 October 2021 following which any changes to the default arrangement made as noted above will be reflected in the Default SIP.

As part of the previous default investment strategy review completed in April 2019 the Trustees decided to move 50% of the global equity portfolio into an actively managed multi-factor mandate with a sustainability overlay and this was completed on 18 December 2019. On 6 June 2020 the Trustees, after taking appropriate professional investment advice, made the decision to move the remaining 50% of the global equity portfolio into the same fund. This transition, which affected funds included in the default investment strategy, was completed on 27 October 2020.

The Default SIP was updated on 28 March 2021 to reflect the change to the global equity portfolio noted above and updated again on 3 June 2021 to incorporate minor drafting changes. The Default SIP in the appendix to this statement was approved again with no changes on 21 September 2021.

The next full review of the default strategy and the performance of the default arrangement is intended to take place by 14 October 2023 or following any significant change in investment policy or the Fund's member profile.

In addition to the processes described above, the Trustees also monitor the performance of the funds in the default arrangement on a quarterly basis. Based on the monitoring conducted during the Scheme year the Trustees are satisfied that the funds in the default arrangement were performing broadly as expected and consistent with their aims and objectives. No changes were made to the funds in the default arrangement as a result.

The table below shows return figures over the previous 1 year and 5 years. The Trustees are satisfied that the objectives of the funds making up the default investment strategy are being met. It should be noted that the Fund year witnessed very volatile market returns. The exceptionally high returns from the UUKPF's two growth funds are not expected to be repeated on a consistent basis.

| Fund                 | Objective aim                                                                                                                                                                                                                            | 1 year return to 31 March 2021 | 5 year return to 31 March 2021 (p.a.) |
|----------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------|---------------------------------------|
| Moderate Growth Fund | Achieve a return over the long term (5 years or more) that exceeds the return on the cautious growth fund (albeit with a higher prospect that a negative return could be experienced over the same period than the cautious growth fund) | 33.6%                          | 9.5%                                  |
| Cautious Growth Fund | Achieve a return over the long term (5 years or more) that exceeds the return on the cash fund (albeit with a higher prospect that a negative return could be experienced over the same period than the cash fund)                       | 16.6%                          | 7.0%                                  |
| Cash Fund            | Preserve capital whilst aiming to provide a return on investments similar to that which might be achieved on cash deposits in a bank or building society                                                                                 | -0.1%                          | 0.3%                                  |

### Core financial transactions

The efficient running of a DC arrangement depends on the prompt and accurate processing of financial transactions which include (but are not limited to):

- the investment of contributions to the DC arrangements;
- the transfer of assets relating to members into and out of the DC arrangements;
- the transfer of assets relating to members between different investments within the Investing plan; and
- payments from the DC arrangements to, or in respect of, members.

The completion of these transactions involves various external parties. The Trustees understand that if the above transactions are not processed correctly or are delayed, members' retirement savings could be affected. As such the Trustees operate measures and controls aimed at ensuring that the correct amounts for the correct members are invested, or paid out to, or in respect of, members in a timely manner. It is the Fund's administrators – Capita and Fidelity – who process core financial transactions. The measures and controls operated by the Trustees are:

## **UNILEVER UK PENSION FUND DEFINED CONTRIBUTION ANNUAL STATEMENT (continued)**

### ***Service Level Agreements (SLAs)***

Agreements are in place with both Capita and Fidelity by which they commit themselves to complete a range of tasks and which set out how long each task (including core transactions) should take and the agreed expectations for service level performance levels. The service levels are based on legal requirements, regulatory guidance and industry practice. In addition, to help Trustees monitor that the SLAs are being met:

- Fidelity and Capita report quarterly on their performance against those SLAs; and
- Fidelity confirm on a quarterly basis whether contributions have been processed accurately and in a timely manner by them in accordance with the agreed SLAs. Fidelity provided positive assurance that this was the case for the relevant scheme year.

Fidelity and Capita report on any transactions not processed within their SLAs. The Unilever UK pensions team (UUKP) then investigate the cause of the delay and agree any remedial actions. As noted further below, there are agreed actions to improve certain administration processes.

### ***Contribution checks***

The Unilever UK Pensions Finance Team carries out a monthly reconciliation, on a member by member basis, to identify any differences between the contributions reported as being paid to the Investing plan by the payroll provider and the contributions reported as being received by the Investing plan provider. This reconciliation is also carried out at Fund year end. Any differences are reported to the UK Pensions Expert Administration Team for investigation and correction if necessary.

The UUKP also carries out an annual reconciliation of members paying extra voluntary contributions to ensure that members have received the full Company matched contribution.

The UUKP Finance Team carries out a reconciliation of the contributions paid to the legacy AVC providers on an annual basis.

### ***Processes in place with external parties***

Fidelity have their own internal processes and controls in place to ensure financial transactions are processed promptly and accurately. These processes include:

- A reconciliation of the contribution file against the payment amount received;
- A reconciliation of payments received against payments invested;
- A check to ensure all deals have been placed, and to identify any undealt cash;
- A report to identify members for whom contributions have not been received over a particular period (where Fidelity would have expected to receive contributions); and
- Contributions are invested automatically according to members' instructions – to ensure speed of investment.

UUKP have further reviewed the processes in place and considered the various metrics that are tracked on a quarterly basis to assess core financial transactions which in summary assess the speed and accuracy of the investment of contributions, transfers in and out, disinvestment on retirement and investment switches.

The results of all the above reporting and monitoring checks are summarised on a quarterly basis in a report that is given to the Audit and Risk Committee of the Trustees.

From carrying out their checks the Trustees are satisfied that the majority of core financial transactions have been carried out promptly and accurately during the Fund year. Last year we reported that there were continuing issues with the time taken to invest monies received from transfers in or to pay out transfers following the disinvestment of monies, and that a detailed review of the processes, monitoring and reporting was undertaken in 2020 which identified where the administration processes could be improved. These process improvements and additional monitoring and reporting have been implemented and the impact of these improvements is expected to be seen in the 2021/22 year.

### ***Equitable Life DC funds – Transfer to Utmost Life and Pensions***

Following the policyholders' vote and High Court approval in November 2019, the vast majority of Equitable Life policies were transferred to Utmost Life and Pensions on 1 January 2020. This was the case for the two policies held by the UUKPF Trustees. As part of the arrangement, members who had with profits funds with Equitable Life (excluding Clerical Medical with profit funds) had their funds converted to unit linked funds and in return for the removal of any guarantees attached, they received a one-off uplift to their fund value.

## UNILEVER UK PENSION FUND DEFINED CONTRIBUTION ANNUAL STATEMENT (continued)

The Trustees, after taking appropriate legal and investment advice, decided that the former with profits funds should, in the first instance, be invested in a Secure Cash Fund, a temporary fund offered by Utmost to assist in the transition of accounts. Members were written to in April 2020 to give them information about the options they had with the long-term investment of these former with-profit funds. The Trustees decided that in the absence of any specific member instruction, these pension savings should be transferred to and invested in accordance with the default strategy investment option that applies under the Investing Plan. The bulk transfer from Utmost to Fidelity took place on 30 June 2020.

### Charges and transaction costs

This section covers charges and transaction costs applicable to arrangements under the Fund.

#### Investing plan

Each Investing plan fund carries a 'total charge', which includes an investment management charge, as well as the costs of administering the Investing plan. This is called the 'Total Expense Ratio' (TER) and is expressed as a percentage of the fund value. Members pay these charges from their account, and the charges will vary from fund to fund. Fidelity take account of the charges when they work out the daily quoted price for each fund.

The table below sets out the TERs that applied to the Investing plan funds in the default arrangements and the self-select funds during the Fund year to 31 March 2021:

| Fund                  | Charge during the Fund year to 31 March 2021 |
|-----------------------|----------------------------------------------|
| Moderate Growth Fund* | 0.405%                                       |
| Cautious Growth Fund* | 0.358%                                       |
| Cash Fund*            | 0.250%                                       |
| Bond Fund             | 0.215%                                       |
| Global Equity Fund    | 0.347%                                       |
| Emerging Markets Fund | 0.320%                                       |
| Real Return Fund      | 0.210%                                       |

\*The three funds together are used in the default automatic switching facility. However, they are also offered separately as self-select funds or part of other self-select automatic switching facilities.

The Department for Work and Pensions has, from April 2015, stated that the total charges for default funds within DC schemes used for automatic enrolment should be capped at 0.75%. The Trustees are pleased to confirm that the charges for all Investing plan funds are comfortably below this charge cap.

In this statement we are also required to show details of the transaction costs that have applied during the year. Transaction costs are incurred by members and are reflected in the unit-price of the underlying fund. They occur due to:

- Investment managers buying and selling securities (tradable financial assets) underlying the funds, as part of the day to day management of those funds; and
- Members requesting switches between funds, or those switches taking place during automatic switching;

The transaction costs shown below are provided by Fidelity and have been calculated on a methodology known as 'slippage cost'. This compares the price of the stocks being traded when a transaction was executed, with the price at which the transaction was requested. Market movements during any delay in transacting may be positive or negative and may also outweigh other explicit transaction costs. For this reason, overall transaction costs calculated on the slippage method can be negative as well as positive.

| Fund                  | Transaction Costs to 31 March 2021 |
|-----------------------|------------------------------------|
| Moderate Growth Fund  | 0.08%                              |
| Cautious Growth Fund  | 0.05%                              |
| Cash Fund             | 0.00%                              |
| Bond Fund             | -0.04%                             |
| Global Equity Fund    | 0.06%                              |
| Emerging Markets Fund | 0.00%                              |
| Real Return Fund      | 0.14%                              |

## UNILEVER UK PENSION FUND DEFINED CONTRIBUTION ANNUAL STATEMENT (continued)

### *Default automatic switching facility – Variation of charges and transaction costs*

The default automatic switching facility has been set up as a lifestyle approach, which means that members' assets are automatically moved between different investment funds as they approach their target retirement date. In the Investing plan, the default arrangement members are invested in is a 100% allocation to the Moderate Growth Fund whilst they are at least 10 years from the target retirement date. As the member approaches retirement, assets are gradually moved to the Cautious Growth Fund, and then the Cash Fund.

This means that the level of charges and transaction costs will vary depending on how close members are to their target retirement date, due to the weighting of the funds they are invested in. The annualised charges and transaction costs applicable as at 31 March 2021 (but noting that the charges and costs applicable throughout the scheme year for each fund are set out on the previous page) and the weighting of the funds are set out in the table below at various points in the default arrangement.

| Years to target retirement date | Weighting of Funds                         | TER    | Transaction Costs |
|---------------------------------|--------------------------------------------|--------|-------------------|
| 10+ years                       | 100% Moderate Growth                       | 0.405% | 0.080%            |
| 7 years                         | 70% Moderate Growth<br>30% Cautious Growth | 0.391% | 0.071%            |
| 4 years                         | 40% Moderate Growth<br>60% Cautious Growth | 0.377% | 0.062%            |
| 2 years                         | 50% Cautious Growth<br>50% Cash Fund       | 0.304% | 0.025%            |
| At retirement                   | 100% Cash Fund                             | 0.250% | 0.000%            |

### *Legacy AVCs*

The data on charges and costs available as at 31 March 2021 from the legacy AVC providers at the time of production of this statement is shown below.

The Trustees have taken all reasonable steps to obtain the information, but not all of the costs and charges information has been received. Where there are gaps in the data currently available, the Trustees are continuing to request this information at regular intervals and to understand the reasons why information hasn't been produced so far. The Trustees will make available on the Fund's website the currently missing data as soon as it becomes available.

Investment managers sometimes differ in their methodologies of calculating and presenting information on charges. Additionally, not all managers use consistent terminology when describing costs and charges.

In general, the Annual Management Charge or 'AMC' refers to investment management and administration costs that are taken by the provider as they invest and administer the AVC policy. Some investment funds will have higher AMCs than others owing to their specialist nature or the complexity in managing them. For example, with-profit funds usually provide guarantees that require complex actuarial calculations and this necessarily entails costs that are not incurred by other types of funds.

The Total Expenses Ratio or 'TER' generally includes the AMC but also includes additional expenses incurred by the investment manager such as legal fees, audit fees and marketing fees. While some managers have shown the AMC and TER separately, others have shown only the TER for some funds. In such cases, the Trustees have asked for further disclosure in the interests of transparency but note that the TER is the most important headline figure as it represents the total charges incurred by members other than those arising from buying and selling investments.

The term 'Aggregated transaction costs' refers to all of the costs associated with trading (buying and selling) investments within an investment fund. Charges and transaction costs on some funds, particularly with-profit funds and cash deposit funds, are not always calculated explicitly by providers but are instead incorporated into other calculations such as the bonus rate or interest rate declared. In some cases, the figures disclosed by providers are therefore estimates or illustrative in nature.

Additionally, some with-profits providers emphasise that deductions set aside to cover the cost of guarantees depend on factors such as the underlying investment performance and can therefore vary from year to year. The costs and charges can change over time in particular aggregated transaction costs are prone to vary in individual years depending on the amount of trading activity undertaken on a particular fund and market conditions during trading (see previous explanation of the 'slippage' methodology for calculating these transaction costs).

NOTES:

1. Annual Management Charges and Total Expense Ratios have been sourced from Standard Life fund factsheets as at 31 March 2021 and as per last year a 0.5% scheme discount has been applied to the AMC and TER.
2. These funds do not have explicit charges as these are wrapped up in the declared bonuses. These charges include an allowance for the cost of guarantees and are the deductions that Standard Life currently use for illustrative purposes.

**UNILEVER UK PENSION FUND**  
**DEFINED CONTRIBUTION ANNUAL STATEMENT (continued)**

NOTES:

1. Utmost has advised that with the exception of the Property fund (see note 2) the total charges impact is calculated by adding the annual management charge and aggregated transaction costs.
2. In addition to the charges shown, property management expenses of 0.81% p.a. for the year ended 31 December 2020 were incurred.
3. All assets in the Secure Cash Fund were transferred to the funds available in the Investing plan on 30 June 2020.

Other

As noted above, for some legacy AVC funds the investment managers have advised that there are no explicit costs. Rather, costs are included in the calculation of returns and are not calculated separately. The funds in this category are as follows:

**UNILEVER UK PENSION FUND  
DEFINED CONTRIBUTION ANNUAL STATEMENT (continued)**

| Manager    | Fund              | Manager disclosure                                                                                                                                                                                                                                                                                                                                                                                         |
|------------|-------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Prudential | Deposit Fund      | There are no explicit charges applied to the Deposit Fund. Interest, once added, is guaranteed and withdrawals from this fund are not subject to any deductions. This fund is invested in the Prudential With-Profits Fund and has aggregated transaction costs of 0.1025% for the fund year ending 5 April 2021.                                                                                          |
| Santander  | Cash deposit fund | Members in the Cash Deposit Fund are invested in cash and, since April 2020 receive interest on a daily basis equivalent to 0.00% per annum (previously 0.25% per annum). This is not like a typical unitised fund - there are no explicit annual management charges and no other maintenance charges on this account. As such, Santander does not provide any cost and charges information for this fund. |

**Impact of costs and charges - Illustrations**

The Trustees must prepare an illustration showing the impact of the costs and charges typically paid by a member of the plan on their retirement savings outcomes. The illustrations below meet the statutory guidance provided by the Department for Work and Pensions.

As well as taking into account the fund charges deducted in relation to investment management and administration services (the Annual Management Charge, or 'AMC'), the illustrations also allow for investment transaction costs.

All of the projected fund values shown are purely illustrative and are based on assumptions set out below regarding future rates of return and inflation that may not be borne out in practice. The illustrative fund values are expressed **in today's terms** and do not need to be reduced further for the effect of future inflation. For example, a projected fund value after 30 years of £96,900 means that the fund value at the end of that period would be an amount that has equivalent purchasing power to that of £96,900 today.

Illustrations have been prepared for the following funds in line with the guidance provided by the Department for Work and Pensions.

- Default investment strategy
- Fund with the highest expected returns (Emerging Markets Fund)
- Fund with the lowest expected returns (Bond Fund)
- Fund with the highest charges (Moderate Growth Fund)
- Fund with the lowest charges (Bond Fund)

In addition, we have included the Global Equity Fund as the most popular self-select fund.

The following example illustrations show the impact of charges for members who continue to contribute until they retire (examples A, B, C, D, and E) and for members who have ceased contributions; whether as an active member or due to being a deferred member (examples F and G).

In preparing the illustrations, the following assumptions have been made:

- Future inflation assumed to be 2.5% p.a.
- Contributions assumed to increase at 2.5% p.a. (where paid).
- The default investment strategy projected growth rates vary with age, given that the strategy's asset allocation changes over the 10 years prior to age 65. The following are examples of average growth rates used;
  - Age 19 = 4.84 p.a. (before charges). Average TER is assumed to be 0.393% p.a. and transaction costs are assumed to average 0.04% p.a.
  - Age 25 = 4.82% p.a. (before charges). Average TER is assumed to be 0.392% p.a. and transaction costs are assumed to average 0.04% p.a.
  - Age 35 = 4.76% p.a. (before charges). Average TER is assumed to be 0.387% p.a. and transaction costs are assumed to average 0.04% p.a.
  - Age 45 = 4.64% p.a. (before charges). Average TER is assumed to be 0.379% p.a. and transaction costs are assumed to average 0.03% p.a.
  - Age 55 = 4.31% p.a. (before charges). Average TER is assumed to be 0.355% p.a. and transaction costs are assumed to average 0.03% p.a.

**UNILEVER UK PENSION FUND**  
**DEFINED CONTRIBUTION ANNUAL STATEMENT (continued)**

- Emerging Markets Fund average growth rate before charges is assumed to be 5.00% p.a. Average TER is assumed to be 0.32% and transaction costs are assumed to average 0.00% p.a.
- Cash Fund average growth rate before charges is assumed to be 2.00% p.a. Average TER is assumed to be 0.25% and transaction costs are assumed to average 0.00% p.a.
- Moderate Growth Fund average growth rate before charges is assumed to be 5.00% p.a. Average TER is assumed to be 0.405% and the transaction costs are assumed to average 0.04%.
- Cautious Growth Fund average growth rate before charges is assumed to be 5.00% p.a. Average TER is assumed to be 0.358% and the transaction costs are assumed to average 0.03%.
- Bond Fund average growth rate before charges is assumed to be 1.4% p.a. Average TER is assumed to be 0.22% p.a. and transaction costs are assumed to average 0.00% p.a.
- Global Equity Fund average growth rate before charges is assumed to be 5.00% p.a. Average TER is assumed to be 0.35% p.a. and transaction costs are assumed to average 0.02% p.a.

While illustrations for a variety of accumulated fund values and contribution amounts are shown, in practice, the Investing plan's membership profile is such that the individual accumulated fund values and annual contribution inputs vary significantly between members, even for members at the same age. No one accumulated fund value or contribution amount is representative of the membership as a whole or representative of a particular age group. However, the annual percentage rates of investment return, Total Expenses Ratio and transaction costs do not depend on the amount of money held in an individual member's Retirement Account. Similarly, they do not depend on the annual amount of contributions that the member is paying. These percentage rates for any fund are the same for all members who invest in that fund, regardless of the amount of their savings.

Finally, it should be noted that in line with legal requirements, these illustrations are designed only to show the cumulative impact that investment charges and transaction costs can have on accumulated fund values at retirement age. **They are not intended to provide information or guidance to members on whether a particular fund is best suited to their requirements.** In selecting funds, members should have regard not only to charges and potential transaction costs but also to factors such as expected future returns and their capacity for and tolerance of risk.

**Default Investment Strategy**

| Example    | Period of investment to age 65 (years) | Assumed starting fund value (£) | Assumed annual contribution (£) | Total fund at retirement (£) in today's terms |              |                     |

**Value for members assessment**

The Trustees are required to assess annually the extent to which member borne charges and transaction costs represent good value for members. The Trustees receive input from an external consultant, Barnett Waddingham, during this assessment. The Trustees note that value does not just mean achieving the lowest price. Any assessment of value must also consider the overall quality of service. Accordingly, the assessment for the 2020-21 Scheme year considered the following:

- the level of charges borne by members against comparable market alternatives available to the Trustees; and
- the quality of the services received in return for these charges, including:
  - investment performance;
  - the likelihood of a fund achieving its objectives in future;
  - administration service quality.

## UNILEVER UK PENSION FUND DEFINED CONTRIBUTION ANNUAL STATEMENT (continued)

The Barnett Waddingham assessment of value for members advised that the Trustees can rate the Investing plan overall as excellent value in relation to member borne costs and charges when considering the areas above. In doing so, Barnett Waddingham benchmarked the Scheme's charges not only against other bundled arrangements such as master trusts but also against the charges that might arise were the Trustees to adopt an unbundled approach. Barnett Waddingham also considered the likelihood of the funds achieving their objectives in future years.

### *Legacy AVCs*

A smaller number of members (less than 500) of the UUKPF have DC funds remaining in the legacy AVC arrangements. These AVC funds provide a proportionately small top up to members' main benefits provided through the Final salary plan and for a few members of the Career average plan. The Trustees have similarly assessed value in relation to member borne deductions for these legacy AVC funds although note that this assessment is necessarily less comprehensive than the detailed assessment conducted in relation to the Investing plan. The reasons for that include:

#### *Incomplete data on costs and charges*

Although the Trustees have received data on charges from all providers, a number of them do not calculate or disclose explicit costs and charges information for certain funds, notably with-profit and cash deposit funds. Also, some of the caveats that accompany disclosures on costs and charges (for example, in relation to the 'cost of guarantees' in relation to with-profits) make it difficult for the Trustees to assess the reliability of those disclosures.

#### *Lack of detailed comparability with other legacy AVC arrangements*

Few alternative providers of AVC arrangements would be able or willing to quote terms to enable detailed price comparisons to be made.

#### *Lack of data on quality of funds*

As part of a value assessment, the Trustees would wish to assess the quality of the replacement funds from an investment perspective. However, few of the funds under AVC contracts are rated by investment consultants and commissioning a rating for such funds would likely be disproportionately expensive.

Notwithstanding these restrictions, the Trustees have made the following observations on value in relation to legacy AVCs:

- The cash deposit funds available have no explicit charges and offer a low interest, if any, net of implicit charges. A capital guarantee is given which some members value. Given this guarantee, these options appear to offer reasonable value. Also, these members have the option to move these funds to the funds in the Investing plan range if they would like to do so.
- With-profit funds are often not fully transparent in relation to costs and charges. This lack of transparency is evident from the disclosures obtained to date by the Trustees, with some providers stating that they don't calculate explicit charges but rather include them as part of the broader calculations on bonus rates. Also, some providers have mentioned additional charges in respect of the cost of guarantees but have not stated what those costs are. The Trustees will continue to press for additional clarity in relation to the costs and charges borne by these funds. All members of these funds have the option to move their funds to the funds in the Investing plan range if they would like to do so.
- Whilst the majority of unit-linked funds (but not all) have significantly higher total charges than the funds in the Investing plan range, not all of the unit-linked investment funds are directly comparable with the funds in the Investing plan in terms of risk profile and performance expectations. However, the Trustees do regularly write to members with unit-linked funds to provide information on the funds they are in and those offered by the Investing plan, which the Trustees believe offer good value; giving members the option to move their funds into the Investing plan if they wish. A considerable number of members have taken up this opportunity. Some members wished to remain invested in the particular legacy AVC fund that they had selected. However, the option for members to move their unit-linked funds into the Investing plan remains open.

Overall Barnett Waddingham concluded that given the size and nature of the unit-linked legacy AVC arrangements and the charges payable by members, they provide reasonable value for members, albeit the charges payable in some cases are higher

## **UNILEVER UK PENSION FUND DEFINED CONTRIBUTION ANNUAL STATEMENT (continued)**

than would be expected in modern DC arrangements like the Investing plan. As noted above, the option for members to move their funds into the Investing Plan remains open.

### ***Overall Conclusion***

On the basis of the assessment summarised above, with the exception of the legacy AVC funds (discussed above), overall the Trustees are satisfied that the charges and transaction costs borne by members in the Fund offer excellent value for members. All members have access to good value funds that address the varying needs for growth, inflation protection, capital stability and liquidity.

The Trustees also considered other Investing plan features that members receive value from, but which are paid for by the Company – such as the plan communications, the at-retirement support, and the cost of maintaining a Trustee Board with in-house expertise and external advisers. The Trustees note that these demonstrate the broader elements of good value provided by the Investing plan.

### **Knowledge and understanding of the Trustees and external support**

The Fund has continued to run a training programme to ensure that the Trustees meet the legally required Trustee Knowledge and Understanding ('TKU') standards to enable them to exercise their duties and functions as trustees of the Fund. Under the TKU requirements, each Trustee Director must:

- Be conversant with the trust deed and rules of the Fund, the Funds statement of investment principles and any other document recording policy for the time being adopted by the Trustees relating to the administration of the Fund generally;
- Have, to the degree that is appropriate for the purposes of enabling the individual properly to exercise his or her functions as Trustee Director, knowledge and understanding of the law relating to pensions and trusts and the principles relating to investment of the assets of occupational pension schemes.

The Trustees have measures in place to comply with the legal and regulatory requirements regarding conversance and knowledge and understanding. Training is provided throughout a Trustee's term of office and the Trustees annually review whether their approach to training serves their needs. The main features of this training programme and details of how the conversance and knowledge and understanding requirements have been met during the period covered by this statement are described below.

### ***On appointment***

A new Trustee is required to complete an induction programme which aims to provide the legally required knowledge of pensions, and conversance with Fund documents.

This induction programme takes about two days in total and consists of training from UUKP and Uninvest Company on the following aspects:

- An introduction to the UUKPF, its structure and key benefits;
- Overview of the role of a Trustee & Pension Funds;
- Pensions and trust law;
- Funding;
- Investment of assets and Investment strategy; and
- Risk management.

In addition, Trustees are enrolled onto an externally run introductory one or two-day course.

New Trustees must complete both the induction programme and the TPR's online trustee toolkit within the first six months of appointment. The trustee toolkit is an online learning programme in which trustees complete a number of specific modules and assessments in order to be conversant with scheme specific documents and meet the level of knowledge and understanding required by law.

Three new Trustee Directors were appointed shortly after the Scheme year end and are due to complete their induction programmes within the first six months of their appointment.

## **UNILEVER UK PENSION FUND DEFINED CONTRIBUTION ANNUAL STATEMENT (continued)**

### ***After one year***

After 12 months in office, Trustees complete a self-assessment questionnaire to assess their knowledge and understanding of pensions law, investment principles and other areas of knowledge they are legally required to have as well as conversance with scheme documents. Individual plans to address training and development areas are put together for each of the Trustees based on the identified gaps in knowledge following a one to one discussion with a member of UUKP. UUKP provide suggestions to individual Trustees as to how to address those gaps and ask for confirmation when the Trustees have carried out the suggested actions. Each Trustee is annually asked to re-consider their self-assessment and progress made to fill any gaps in order to identify any further development activities they individually should undertake in the coming year.

### ***Ongoing training***

To understand their role better and the specifics of the Fund, Trustees have access to all Fund documents, Trustee policies and key Fund information. Fund documents include the main documents such as the Trust Deed and Rules of the Fund and the Statement of Investment Principles. Trustees are legally required to have a working knowledge of these documents and to achieve this, the importance of these documents and their purpose are covered during the induction training. In order to identify any gaps in knowledge, the Trustees are asked to self-certify whether they have a working knowledge of these documents and should they have any concerns, UUKP will point the Trustees to the documents to read again or if needed go through the documents with them. As part of the annual training review, the Trustees are reminded to continue familiarising themselves with Fund documents including the Balance of Powers which sets out the key Trustees' powers under the Trust Deed and the Rules.

The Trustee policies cover a range of policies which set out the behaviours and requirements of UUKPF Trustees. These are updated as required and the Trustees regularly carry out review of the policies to ensure they remain appropriate.

The Trustees are regularly sent pensions bulletins to assist them in keeping up to date with current matters, including relevant information about changes to pensions law. Any changes to regulations, regulatory practice or the law impacting on the UUKPF or the Trustees will be highlighted at Trustee meetings. When particular matters of strategic importance are being discussed at the Committee or Board, on the job training is provided ahead of any decisions.

The Board conducts at least one formal training day annually, facilitated by external advisors, UUKP or the Uninvest Company, as necessary. An annual Investment Training Day is also facilitated by Uninvest Company for the Board. Other training sessions are run as and when required.

The Trustees keep logs of training received during the year for each Trustee and the Board as a whole; and ongoing training during Board meetings. During the year, training sessions were held on the following subjects:

- Trustee role in sustainable investment
- Actuarial factors
- Cyber Security
- Liability Driven Investment (LDI)
- Property as an asset class within UUKPF
- What a Custodian does
- Sustainable Multi-factor equity (DC Committee only)
- Defining the sustainable investment ambition level for UUKPF
- Options available to members during their UUKPF membership
- Bulk member options exercises
- Member engagement strategy
- Climate scenario modelling
- Liquidity metrics

### ***The skills, experience and external support for the Board***

The Board is strengthened by its diverse professional skills and experiences, along with support from external experts and advisers. This helps the Board with the various challenges that its governance must address and in properly carrying out all its duties as Trustee of the Fund.

The Board is supported by four Committees and the Trustees consider the balance of skills and experience when deciding on the membership of the Committees.

## **UNILEVER UK PENSION FUND DEFINED CONTRIBUTION ANNUAL STATEMENT (continued)**

The DC Committee has been supported by an independent DC professional throughout the year and an independent investment professional also attends each Board meeting and the Investment and Funding Committee. Unilever's in-house pensions team provides the Board with considerable operational support, with at least one of its senior members attending each Committee and Board meeting. The Uninvest Company, the in-house investment professionals, provides support to the Board, the DC Committee and the Investment and Funding Committee.

Taking into account the knowledge and experience of the Trustee Directors with the specialist advice (both in writing and whilst attending meetings) received from the appointed professional advisors (e.g. investment consultants, legal advisors), the Trustees believe they are well placed to exercise their functions as Trustee Directors of the Fund properly and effectively.

To ensure that that the governance of the Board remains appropriate and the Scheme continues to be properly run the Trustees appointed an external facilitator in 2018 to carry out a review of their effectiveness. The review concluded that the governance was strong. A small number of recommendations arose from this review which were considered and implemented where appropriate. The next review is due to commence in late 2021.

Tony Ashford

Chairman, Unilever UK Pension Fund Trustees Limited.

## APPENDIX TO THE DEFINED CONTRIBUTION ANNUAL STATEMENT

### DC Default Strategy Statement

#### 1. Introduction

This statement is prepared in accordance with regulation 2A of the Occupational Pension Schemes (Investment) Regulations 2005. It describes the Trustees' investment principles and arrangements in respect of the default investment option under the Defined Contribution (DC) Section of the Unilever UK Pension Fund ('the Investing plan').

#### 2. Aims and objectives underlying the Default Investment Arrangement

The Trustees recognise that members of the Investing plan have differing investment needs and objectives, and that these may change during the course of members' working lives. The Trustees also recognise that members have different attitudes to risk. The Trustees believe that members should be encouraged to make their own investment decisions based on their individual circumstances. We therefore make available a range of investment options and automatic switching strategies, within the framework set out in the Fund rules, to enable members to tailor their investment strategy to their own needs.

The Trustees also recognise that members may not believe themselves qualified to make choices about investment options. The Fund rules provide for a default investment option and specifies the investment objective that comprises its key components. Consistent with the Fund objective the default investment option chosen by the Trustees aims to deliver real returns over members' working lifetimes, whilst mitigating risk through diversification through holding different equity and bond classes, property and cash. It also encompasses a switch into less risky asset classes in the years prior to age 65 with the ultimate objective that funds at retirement are invested in assets broadly appropriate for an individual withdrawing the funds as cash. There are three component funds in the default strategy: Moderate Growth Fund, Cautious Growth Fund and Cash Fund, and their objectives are below:

| Fund                 | Investment Objectives                                                                                                                                                                                                                             | Policy in relation to investments                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
|----------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Moderate Growth Fund | Achieve a return over the long term (5 years or more) that exceeds the return on the cautious growth fund (albeit with a higher prospect that a negative absolute return could be experienced over the same period than the cautious growth fund) | A pooled fund made available to the Trustee by Fidelity for the purposes of the UUKPF, where unit prices are calculated by reference to a mix of some or all of equities, property, government bonds, corporate bonds, other diversified assets, cash/money market funds, and any other assets with similar investment characteristics as decided from time to time by the Trustee having taken the advice of its investment adviser, with an asset allocation selected to be consistent with the investment objective. |
| Cautious Growth Fund | Achieve a return over the long term (5 years or more) that exceeds the return on the cash fund (albeit with a higher prospect that a negative absolute return could be experienced over the same period than the cash fund)                       | A pooled fund made available to the Trustee by Fidelity for the purposes of the UUKPF, where unit prices are calculated by reference to a mix of some or all of equities, property, government bonds, corporate bonds, other diversified assets, cash/money market funds and any other assets with similar investment characteristics as decided from time to time by the Trustee having taken the advice of its investment adviser, with an asset allocation selected to be consistent with the investment objective.  |

## UNILEVER UK PENSION FUND

### APPENDIX TO THE DEFINED CONTRIBUTION ANNUAL STATEMENT (continued)

| Fund      | Investment Objectives                                                                                                                                    | Policy in relation to investments                                                                                                                                                                                                                                                                                                                                                                                                              |
|-----------|----------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Cash Fund | Preserve capital whilst aiming to provide a return on investments similar to that which might be achieved on cash deposits in a bank or building society | A pooled fund made available to the Trustee by Fidelity for the purposes of the UUKPF, where unit prices are calculated by reference to a mix of some or all of cash deposits, money market funds and any other assets with similar investment characteristics as decided from time to time by the Trustee having taken the advice of its investment adviser, with an asset allocation selected to be consistent with the investment objective |

In light of the above, the Trustees have adopted the following objectives in relation to the default arrangement:

- To generate a good level of real return over members' working lifetimes, whilst mitigating risk through diversification.

*The default arrangement's growth phase structure invests in the Moderate Growth Fund. This Fund holds a diversified range of assets that is expected to provide long term returns similar to those of equities, but with less volatility.*

- To provide a strategy that reduces investment risk for members as they approach retirement.

*As a member's account grows, investment risk will have a greater impact on retirement outcomes. Therefore, the Trustee believes that a default arrangement that seeks to reduce investment risk as the member approaches retirement is appropriate. This is achieved via automatic switching over a 10 year switching period before retirement. Initially funds are switched from the Moderate Growth Fund to the Cautious Growth Fund. This gives members' accounts the opportunity to still grow at a reasonable rate and stay 'diversified' – that is, spread across a range of investments. During the last 4 years before retirement age, funds are switched into the Cash Fund.*

- To invest members' accounts at retirement in assets that are broadly appropriate for an individual planning to withdraw funds at retirement as cash.

*At age 65, 100% of the member's assets will be invested in the Cash Fund reflecting the fact that most members will have acquired significant DB (Defined Benefit) rights (relative to their DC benefits) and will therefore wish to use their account to provide cash rather than additional income.*

- To achieve a market return, subject to fees, broadly equivalent to the composite benchmark (for each Default Fund) which is comprised of the indices of each of the underlying sub funds as outlined in section 8.

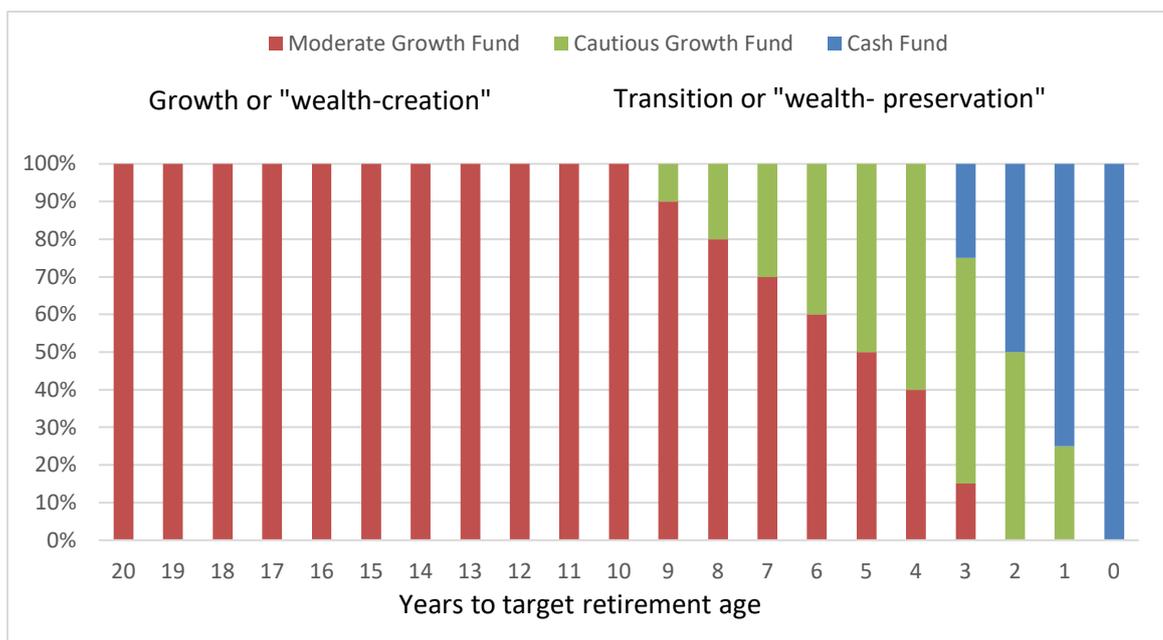

*The Trustees monitor market performance on a quarterly basis.*

### 3. Investments

Members within the default arrangement are invested in a 100% allocation to the Moderate Growth Fund whilst they are at least 10 years from the target retirement age. As the member approaches retirement, assets are gradually moved to the Cautious Growth Fund, and then the Cash Fund as shown in the switching matrix below.

## UNILEVER UK PENSION FUND

### APPENDIX TO THE DEFINED CONTRIBUTION ANNUAL STATEMENT (continued)

#### 4. Measurement and management of risk

Risk is not considered in isolation, but in conjunction with expected investment returns and retirement outcomes for members. In designing the default arrangement, the Trustees have explicitly considered the trade-off between risk and expected returns. The specific risks of which the Trustees take account include, but are not limited to:

**Risk of underperformance:** a fund offered by the Trustees may not meet the relevant investment objective with regard to performance. This risk is considered by the Trustees and their investment adviser within the ongoing review of the performance of the funds.

**Risk of fraud, poor advice or acts of negligence:** the Trustees seek to minimise this risk by ensuring that their advisers and third-party service providers are suitably qualified and experienced, that suitable liability and compensation clauses are included in all contracts for professional services and that suitable due diligence is done on a regular basis.

**Risk of the default investment option being unsuitable for the requirements of some members:** this risk is addressed by giving members a range of options, one of which is the default investment option. Members are provided with a diversified, but limited, range of options which they can choose bearing in mind their attitudes to risk, expectations of returns and intentions with regard to retirement. The Trustees assist members to make suitable choices that may better fit their personal circumstances through communications, including the web portal. Also members in any of the Investing plan's automatic switching arrangements, including the default investment arrangement, are contacted before switching starts.

#### 5. Responsible Investment and Corporate Governance

The Trustees are signatories to the Principles for Responsible Investment (PRI) through the Unilever Pension Funds umbrella agreement. The Trustees believe that investing sustainably allows it to better assess the value and likely future performance of an investment over the medium to long-term. Sustainable investing is about generating a long-term risk adjusted return aligned with the Fund's objectives, whilst at the same time promoting a stable, well-functioning and well governed social, environmental and economic system on which long-term sustainable returns are dependent. The Trustees currently do not take into account any factors we consider to be non-financial. However, this is reviewed on a periodic basis.

## UNILEVER UK PENSION FUND

### APPENDIX TO THE DEFINED CONTRIBUTION ANNUAL STATEMENT (continued)

Of the environmental factors the Trustees take into account, we believe that climate change presents the greatest risk to the long-term value and security of the Fund's assets. The Trustees believe that these environmental factors will have significant and wide-ranging implications for the global economy for the foreseeable future and the potential to impact the dynamics of global growth.

Implementation:

It is the Trustees' policy that all matters are taken into account in the selection, retention and realisation of investments to the extent that they are materially relevant in assessing the future prospects of specific investments, including Sustainability considerations.

The assets are invested in pooled funds but the Trustees require all equity managers to have a Sustainability policy in place and to be signatories to the UN's Principles for Responsible Investment (PRI) as a minimum. The Trustees have given the appointed investment managers full discretion in evaluating Sustainability factors, including climate change considerations. Fixed income managers must also take Sustainability risk factors into account when appropriate. Voting and engagement activities are carried out by the investment managers, who have full discretion.

The Trustees have developed a Sustainable Multi factor Equity fund with an external manager. Due to the importance of Sustainability, this has been included within the default investment option and provides all of the Fund's Global Developed Equity holdings.

#### **6. Other policies in relation to the default investment arrangement**

The Trustees believe that both actively and passively managed funds have a role to play. Active managed funds are utilised to the extent that we either have a high level of confidence in the respective investment managers achieving their performance objectives, or we believe risk is better controlled, net of active investment management fees, within that asset class. For this reason the holdings in the Moderate and Cautious Growth Funds are managed using active and passive management.

Assets in the default arrangement are invested in daily traded pooled funds which hold highly liquid assets. This provides members with greater diversification and transparency of value than if the Trustees invested directly in securities. It also simplifies the Investing Plan's administration. The selection, retention and realisation of assets within the pooled funds are delegated to the investment manager in line with the mandates of the funds.

Details of the arrangements for each underlying fund manager are set out in legal agreements between the manager and the platform provider, the Trustees do not have any direct arrangements with any of the underlying managers and further detail of those arrangements is not therefore included here.

All of the pooled funds used are dealt daily.

The strategic asset allocation of each of the three funds that comprise the default investment arrangement is shown below in section 8.

#### **7. Suitability of the default investment arrangement**

The Trustees believe that the above aims, objectives and policies ensure that the default investment arrangement is designed in members' interests. Their reasons are as follows:

- Most members who retire withdraw their account as tax free cash, reflecting the fact that the Investing plan's DC benefits are supplementary to members' DB pension rights and their requirement for a secure income in retirement will be addressed by that component of their Fund benefits.
- Modelling of future outcomes suggests that members will be able to withdraw a significant proportion of their account as tax free cash over the long-term.

## UNILEVER UK PENSION FUND

### APPENDIX TO THE DEFINED CONTRIBUTION ANNUAL STATEMENT (continued)

- Despite this, members will likely wish to achieve real investment returns for most of their period as pension savers. The use of the Moderate Growth Fund and Cautious Growth Fund address that requirement.

Note that members who intend withdrawing their retirement benefits in other ways, including annuity purchase or income drawdown, have the option of adopting an alternative lifestyle strategy prior to retirement or choosing their own investment strategy.

The Trustees are aware that the pension freedoms effective from April 2015 might result in significant changes to how members choose to withdraw benefits at retirement. We therefore monitor members' decisions and other data items at least annually as part of an ongoing programme for ensuring that the default investment arrangement remains suited to member needs. We also review the investment choices available to members to ensure that those who regard the default arrangement as unsuited to their needs have suitable alternative investment funds to select from.

#### 8. Default Strategy Funds: Manager Structure and Allocations

| Moderate Growth                                                          |              |
|--------------------------------------------------------------------------|--------------|
| <b>Public Equities</b>                                                   | <b>64.0%</b> |
| <i>Sustainable developed market multi-factor equity</i>                  | 58.0%        |
| <i>Emerging Market Equity (Passive Aquila Connect)</i>                   | 6.0%         |
| <b>Real Assets</b>                                                       | <b>10.0%</b> |
| <i>Listed Property (Passive Global Property Securities)</i>              | 10.0%        |
| <b>Fixed Income</b>                                                      | <b>26.0%</b> |
| <i>Multi-Asset Credit (evenly split across two mandates)</i>             | 26.0%        |
| <b>Total</b>                                                             | <b>100%</b>  |
| Cautious Growth                                                          |              |
| <b>Public Equities</b>                                                   | <b>30.0%</b> |
| <i>Sustainable developed market multi-factor equity</i>                  | 27.0%        |
| <i>Emerging Market Equity (Passive Aquila Connect)</i>                   | 3.0%         |
| <b>Real Assets</b>                                                       | <b>7.5%</b>  |
| <i>Listed Property (Passive Global Property Securities)</i>              | 7.5%         |
| <b>Fixed Income</b>                                                      | <b>50.0%</b> |
| <i>Multi-Asset Credit (evenly split across two mandates)</i>             | 25.0%        |
| <i>Fixed Interest Gilts (Passive Over 15 Year Gilt Aquila Connect)</i>   | 12.5%        |
| <i>Index Linked Gilts (Passive Over 5 Year Index Linked Gilt Aquila)</i> | 12.5%        |
| <b>Cash</b>                                                              | <b>12.5%</b> |
| <i>Cash (Active Cash fund)</i>                                           | 12.5%        |
| <b>Total</b>                                                             | <b>100%</b>  |
